CANON LAW TEXTS IN MANUSCRIPT No 48, 15TH CENTURY
FROM THE BULGARIAN ACADEMY OF SCIENCES LIBRARY

(Summary)

The present article is a contribution to the source base of the penitential versions in the South-Slavonic writing tradition. The textological and linguistic particularities of manuscript No 48 are analysed. Described as a Slouzebnik and Molitvenik, in fact it contains a large and various canon law compilation, similar to the Jagic edition from Starine, 1874. The study aims at pointing out its structural and linguistic identity – the first step to typological classification.
